San Diego, CA 92108
(619) 299-5072

Software Designer

22nd January 2019

Job Overview

Location: San Diego, CA

Reports To: Carla Hernandez & Seidy Villalobos

General Job Description

As the Software Engineer, you will be responsible for the software development life cycle process and software design. You will be working in a fast paced environment where you can truly practice your innovating skills and utilize our software technology to its full potential.

Duties & Responsibilities

- Uphold top programming practices and standards
- Negotiate, develop, and ensure timely delivery of technical interchange meetings, and regular working group meetings
- Work with technical departments to mitigate technical risks and ensure product deliveries are on schedule
- Develop high quality production-ready code in an agile environment

Qualifications

- Bachelor of Science in electrical, computer, aerospace engineering, or similarly relevant discipline
- 5+ years of professional industry experience
- Outstanding leadership and organization skills
- GPA of 3.0 or above
- Must be an HBSA and ULSA paid member
- Additional documents: Resume, Cover Letter, LinkedIn Account
