Software Engineer

22nd January 2019

JOB OVERVIEW

Location: San Diego, CA, Los Angeles, CA
Reports To: Eddie Lopez & Javier Piñón

GENERAL JOB DESCRIPTION

As one of the many Software Engineers you will be responsible for creating and enabling different combat systems, sensors, cognitive models and synthetic environment effects. You will work with the Nyoom aircraft Mechanics to build new features and continue to innovate.

DUTIES & RESPONSIBILITIES

While working at Nyoom you will be tasked with the development, updating, and improving the different operating systems on our various models of drones and drone tech. Not only will you be maintaining and developing front end interactions, but you will also be overseeing back end data management.

QUALIFICATIONS:

- Must have extensive knowledge and experience with different coding programs
- Must be able to work within a team or solo
- Must thrive in fast-paced, dynamic environment.
- Must be able to quickly adapt to different problems that may arise

- Excellent problem solving and troubleshooting skills.
- Clear communication skills are required to effectively work in an open, collaborative environment.

Required Documents: Resume, Cover Letter, and LinkedIn Account
